

GOOGLE™ EARTH ENTERPRISE

FBS is Google's first geospatial partner outside the U.S.A. and only its third worldwide. We resell the Google Earth Enterprise suite consisting of Google Earth Enterprise (GEE) Server, Google Earth Fusion and Google Earth Client. FBS also provides first line technical support, training, installation, integration and custom development services for Google Earth.

Google Earth Fusion integrates geospatial data into the GEE system – raster (imagery and terrain), custom data points, vector, KML, 3D models and even data stored in traditional databases and file formats. Fusion can be configured to update data so that the GEE system is synchronized to the latest available datasets. Once data has been integrated and styled, it is delivered to the GEE Client via Google Earth Server.

Earth Server optimizes delivery and display performance by streaming rich 3D and 2D content to the GEE Client as small Internet-friendly “tiles.” Earth Server hosts a client's stand-alone virtual world (built by GEE Fusion), optionally layered on top of Google's own rich world of terrain, imagery, vector and 3D models. Earth Server supports up to 250 simultaneous users per server.

Google Earth Enterprise Client is the visualization, printing, authoring and sharing component of the Google Earth suite that runs on any Windows computer powerful enough to display virtual world graphics. Enterprise Client can represent up to 256 layers of GIS data in any combination making it possible to:

- Annotate place marks with hyperlinks
- Provide multiple levels of data detail
- Synchronize disparate datasets
- Display and print high-resolution FBS 3D models
- Import geo-referenced data
- Superimpose data directly and accurately on 3D terrain
- Film virtual landscapes

FBS operates its own copy of Google Earth to display and resell its orthoimagery, 3D models, base maps, parcels, floodplains, contours and other geodata and products.

ENTERPRISE
PROFESSIONAL
.....

Imaging Earth is our expertise. A wholly-owned subsidiary of J. D. Barnes Limited, (founded in 1960), First Base Solutions has been providing geospatial products and services that include digital aerial image acquisition, orthophotography, and rapid production of cityscapes comprising tens of thousands of precision 3D models. We also develop web e-commerce mapping applications and offer Google Earth Enterprise as one of only three Google geospatial partners worldwide and the first outside the USA.
