

# WebGEO Create your Online Imagery Store

WebGEO is the world's only commercially available turnkey application solution that enables web-based real time viewing (using the Google Maps API), selection, purchase and immediate online delivery of aerial imagery and geodata.

## Easy-to-Use, Superfast "In-and-Out" Purchase Process

- Visually, using a point-and-click or draw-and-click tool to outline a geographic area on the Google Maps interface
- Textually, entering information such as a street address, tile number, location name, intersection, etc. into our search engine
- Clients can pay in a variety of currencies for their selections via a highly secure credit card and/or "on-account" payment system.
- Funds are deposited immediately and directly to your financial institution
- WebGEO compiles customer's individual orders into a single zipped file.
- File is placed on a secure FTP web space.

## Highly Customizable

The look and feel of the website can be modified for your company's corporate colours, company logo, font types and other features that are definable within a "cascading style sheet" (CSS). The website can also be "localized" for most popular languages, currencies, tax structures, etc.

All sales transactions are recorded, and can be reported in real time. The data produced can be sorted and filtered to provide meaningful analysis of average value per sale, trends for purchases, segmentation by user/region, etc.

## Source Code Included

Purchasers of WebGEO get the full source code, which not only guarantees long-term usability but also enables you to develop enhancements that can be integrated into WebGEO. Certain terms and conditions apply.

Imaging Earth is our expertise. A wholly-owned subsidiary of J. D. Barnes Limited, (founded in 1960), First Base Solutions has been providing geospatial products and services that include digital aerial image acquisition, orthophotography, and rapid production of cityscapes comprising tens of thousands of precision 3D models. We also develop web e-commerce mapping applications and offer Google Earth Enterprise as one of only three Google geospatial partners worldwide and the first outside the USA.
