VUMAP

WORK MADE EASY

View geographic data, query the map for more information, measure ground features you see in the imagery and report on your research using this feature-packed online mapping application. Compare imagery year over year and research land information from anywhere with just an internet connection.

MAP WAREHOUSE

DELIVERING DATA THAT DELIVERS RESULTS

Search for data on our online data store, select files covering your location, download your order, and work with aerial imagery and geographic data saved locally. Use the interactive map to locate your area of interest and purchase geo-data easily and quickly with a credit card.

MAPCAST

IMAGERY ON DEMAND

Connect to a high resolution aerial imagery mosaic base layer and elevation contours served directly to your CAD or GIS workstation, just as you would connect to data stored locally. Bandwidth based pricing allows your team to use MapCast as little or as much as you need.

MapWarehouse, presented by First Base Solutions, is Ontario's largest geospatial data marketplace, delivering a comprehensive repository of high-quality imagery and spatial data to your fingertips. With MapWarehouse's growing coverage and expanding data collection, you always get the most up-to-date and relevant data for your project.

MAPWAREHOUSE BENEFITS

Provide A Unique Advantage

Effective visual communication, location intelligence, plus enhanced productivity makes your company stand out above the competition.

Improve Day-to-Day Business Decisions

Accurate, up-to-date, and readily-available information enables your team to make informed decisions based on reliable data.

Enhance Project Accuracy

Layer your own business data over our high resolution orthophoto base layer to view your work site in context and gain a clearer understanding of the tasks ahead.

SEARCH

the map for geospatial data covering your area of interest.

SELECT

tiles of high resolution imagery, parcel boundaries, DEMs, and more.

DOWNLOAD

and save the data you ordered to your local data library immediately.

WORK

with combinations of FBS imagery and data, then add your own work on top.
